

A woman with dark hair tied back, wearing a dark blazer over a striped shirt, is looking down at a tablet computer. The background is a blurred office environment with warm, bokeh-style lighting. The overall mood is professional and focused.

Putting workplace
management at
the control of
your fingertips

Better, faster, more informed decisions

We are SSG Insight, a world class team of smart workplace solution designers, developers and industry experts. Through greater insight, our clients are empowered to make better, faster, more informed decisions to stay in control of their businesses.

Workplace solutions

We design and implement smart workplace management solutions that deliver game-changing outcomes for our clients. Our solutions have the power to remodel the future of your organisation.

Smarter outcomes

We help companies work smarter to enhance their performance, improve efficiency, drive costs down, reduce risk and increase profits.

Powering smarter outcomes

Agility is our industry-leading workflow and asset management system. Our flagship application provides an extensive portfolio of CMMS/CAFM tools at your fingertips.

Our software manages people and machines, it listens to assets and unites data across the key areas of your organisation. It allows you to measure and be measured by your customer.

This is how we help our clients realise the true power of workflow insight to **work smarter, enhance performance, reduce risk and increase profits.**

Agility is a cloud-first, web-based platform dedicated to the delivery of smart outcomes in the workplace. As a result, we can offer our clients a fully supported, end-to-end service.

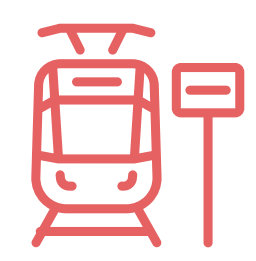

Agility modules and key features:

- / Preventive and predictive maintenance
- / Inventory and purchasing
- / Asset and equipment management
- / Labour management
- / Helpdesk
- / Scheduling and automated work distribution
- / Dedicated mobile app for iOS and Android
- / Live dashboards and reporting
- / IoT and third-party system integration

Agility provides maximum control when you need it most.

Agility delivers tangible results

We deliver business-critical improvements with measurable outcomes, across the globe in multiple sectors.

Transport

Nottingham Express Transit

90% reduction in downtime

Agility reduced the downtime on Nottingham trams from 10 days to 1 through preventative maintenance.

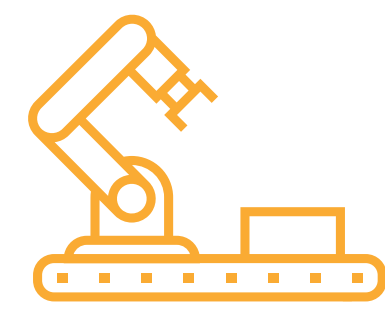

Defence

BAE Systems

10,000 assets managed

“Agility’s allowed us much more flexibility, reduced our paperwork and made allocating jobs to our engineers much more efficient.”

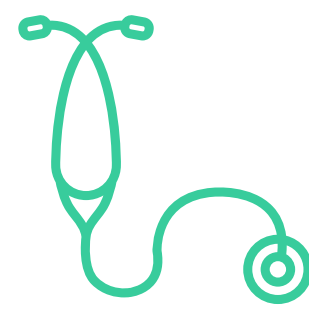

Manufacturing

Bakkavor

70% proactive maintenance

“Through using Agility, Bakkavor has seen a significant improvement on its reactive versus planned maintenance from 80/20 to 50/50.”

Healthcare

Fiona Stanley Hospital

£1 million cost saving

Managing in excess of 80,000 work orders a day helped Fiona Stanley Hospital reduce their admin costs by £1 million per year.

Facilities Management

Castlefield Estates

10% labour saving

“In our business, if you can’t get a plate on the table, you won’t survive. Agility has helped us to grow, to manage and plan our progress, identify gaps in the workforce and recruit.”

Distribution

Wavin

80–85% proactive maintenance

Accurate production data capture has allowed plastics supplier Wavin to run their toolroom at 80-85% proactive maintenance.
